EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

On page 1, line 2 of the specification, --This application is a continuation-in-part of U.S. Pat. Application 09/814,531, filed March 21, 2001 (abandoned).-- has been inserted.

Pursuant to MPEP § 606.01, the title has been changed to --SPIN-VALVE TYPE THIN FILM MAGNETIC ELEMENT HAVING BIAS LAYERS AND FERROMAGNETIC LAYERS--.

2. The following is an examiner's statement of reasons for allowance:

Regarding claim 1: The prior art of record neither shows nor suggests wherein the bias layers comprise at least one material selected from the group consisting of α -Fe₂O₃ and CoO, and wherein the antiferromagnetic layer comprises an alloy containing at least one element selected from the group of Pt, Pd, Rh, Fe, Ru, Ir, Os, Au, Ag, Cr, Ni, Ne, Ar, Xe and Kr, and Mn, in combination with the specifically claimed structures of bias and ferromagnetic layers. Although such materials are known in the art to be antiferromagnetic, the prior art of record neither shows nor suggests any motivation to use each specific material in its specific location in combination with the other material in its location, and further in combination with the specifically claimed structures of bias and ferromagnetic layers.

Regarding claims 12-15: The prior art of record neither shows nor suggests the claimed free magnetic layer materials in combination with the specifically claimed structures of bias and ferromagnetic layers.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

3. Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only.
